SUMMARY

Computer Engineering graduate with expertise in programming, software engineering, full-stack development, web development, algorithms, data structures, and systems design. Proficiency in HTML5, CSS3, Python, Javascript, C++, C#, and Java, with hands-on experience in Scrum/Agile, SDLC, and IEEE-compliant technical documentation. Adept at designing, testing, and deploying scalable software solutions, with deep focus on performance, reliability & maintenance code. Bilingual in Spanish & English, with experience collaboration between remote & cross-functional environments.

PROFESSIONAL EXPERIENCE

Full-Stack Development | Independent Project | Toa Baja, PR | Oct 9, 2026 - Oct 26, 2026

- Developed a new portfolio website using HTML5, CSS3, and JavaScript at Visual Studio Code, and uploaded towards the GitHub platform for better handling & sharing.

Front-End Development | Independent Project | Toa Baja, PR | Apr 2025 - May 2026

- Engineered an end-to-end portfolio website prototype using HTML5 and CSS3, applying software engineering and systems design fundamentals to deliver responsive, cross-browser compatible, and accessible user experiences.
- Utilized GitHub for distributed version control and automated deployment, demonstrating operational expertise in software delivery and reliability engineering.
- Applied knowledge from PUPR Computer Engineering coursework, including Software Engineering, Data Structures, and Algorithms, to solve complex implementation challenges and ensure code quality.

Software Engineering & QA | Capstone Design Project: SIGHT | Polytechnic University of Puerto Rico, San Juan, PR | Nov 2020 – Jun 2022

- Reviewed and validated IEEE-compliant technical documentation, including SRS, SPMP, STD, and SDD, for a distributed capstone system, ensuring requirements traceability and architectural integrity.
- Designed and executed a comprehensive software testing strategy for a web application, authoring 15+ test cases covering functional, usability, regression, and reliability testing to meet QA standards.
- Collaborated in an Agile/Scrum team environment, participating in sprint planning, code reviews, and technical design sessions while applying Software Engineering, Operating Systems, and Database Systems concepts.

EDUCATION

Bachelor of Science in Computer Engineering | Polytechnic University of Puerto Rico, San Juan, PR | Completed: Aug 2014 – Jul 2022

CERTIFICATION

Alison:

- Scrum Master Training | May 7, 2024
- Agile Master Training | May 24, 2024
- Introduction to HTML and CSS | July 4, 2024
- Introduction to Artificial Intelligence (AI) | Dec 26, 2025
